

MODELS 8310LP AND 8310HP

PRESSURE REDUCING REGULATORS

The Models 8310LP and 8310HP are high capacity, self-contained pressure reducing regulators with a double-seat design. These units are utilized to control outlet (downstream) pressure between 1 – 200 psig (.07 – 13.8 Barg). Available in two outlet pressure designs; the Low Pressure, LP design has larger diaphragm for reduced pressures up to 30 psig (2.07 Barg), and the High Pressure design has a smaller diaphragm for reduced pressures up to 200 psig (13.8 Barg).

Model 8310HP

Model 8310LP

FEATURES

- | | |
|---------------------------------------|---|
| High Capacity: | The double ported design provides high flow capacity, the highest capacity regulators Cashco manufactures due to dual ports. |
| High Stability: | Outstanding operation resulting from balanced design which minimizes imbalance plug forces, even at very high pressure drops. Diaphragm isolated from fluid velocity effects. |
| Heavy Guiding: | Plug is top and bottom guided with hardened stem guides. |
| Broad Setpoint Range: | 8310LP: 1–30psig(.07–2.07Barg)
8310HP: 10 – 200 psig (.7 – 13.8 Barg) |
| High Pressure Drop Capability: | 8310LP: Up to 200psid(13.8Bard).
8310HP: Up to 450psid(31.0Bard). |

APPLICATIONS

Designed for controlling a wide range of fluids including air, inert gases, chemicals, water, fuel oils and steam. See Table 4 for more information.

OPTION SPECIFICATIONS

This section indicates special variations which are available to the standard Model 8310 products. Multiple options may be selected; i.e. 8310HP -3+15, which is the standard 8310HP product plus Opt. -3 and Opt. -15 together. Care must be exhibited to not develop conflicting combinations; i.e. 8310HP-3+20.
