

Valve Concepts, Inc. ISO Registered Company

MODEL 8920 Shown

## OBJECTIVE

The 8900 Series manway pressure and pressure / vacuum relief vents provide emergency pressure relief beyond that furnished by the normal pressure vent for atmospheric and low pressure tanks, as well as a convenient access for tank cleaning, inspection and repair. Emergency relief vents provide relief from excessive internal pressure which may be caused by an abnormal condition; such as ruptured internal heating coils, an external fire, a failure of the tank blanketing system, a sudden cooling of the tank or a break in the tank wall.

## TECHNIQUE

The pressure pallet assembly provides an effective vapor-tight seal when the tank is not under emergency conditions. If the tank out breathing requirements exceeds the capability of the normal pressure relief vent, under emergency conditions, the pallet assembly lifts off the seat to allow escape of vapors, preventing damage to the tank due to excess pressure. When the excess pressure is relieved the pallet assembly will reseat to again provide a vapor-tight seal.

# 8900 Series Manway Emergency Relief Vents 

## CONSTRUCTION

Standard flange base is a one piece casting that includes lifting lugs and a pad to accommodate the bolted on "Hinged" design.

## SPECIAL FEATURES

Easy Inspection and Maintenance: The 8900 Series vents are rugged in design, yet light weight for easy handling, inspection and maintenance. The pressure pallet assembly can be removed to allow unobstructed access to the tank for tank entry, inspection, and repairs.

Modular: As part of the Valve Concepts, Inc. modular vent product line, the 8900 Series can be converted from pressure/vacuum to pressure only relief design. Available as either a top guided (spring loaded) or hinged (weight loaded) vent.

Maintains Accurate Pressure Settings: For all sizes with Hinged design, pressure range is $<1 / 2$ psig. The top-guided design pressure range is $1 / 2 \mathrm{psig}$ to 15 psig. For Models 8920 and 8940 vacuum setting ranges from 0.2 to $4 \mathrm{oz} / \mathrm{in}^{2}$. Vacuum set point pressure can be easily changed without dis-assembly of the vent.

Air Cushion Pallet Design: Utilizes a flat diaphragm in place of an O-ring for sealing. The thickness of the diaphragm is based on the vent size and the customer specified set point. It forms around the seat to provide a tight seal due to the air cushion pallet design.

Dual Action Swivel Hinge: Models 8930 and 8940 utilize a dual swivel hinge design with two directional rotation. Allows pressure pallet to rest evenly on the seat. Optional locking feature is available to secure the pallet sub-assembly in the open position for tank inspection and maintenance.

| Product Selection Guide |  |  |
| :---: | :---: | :---: |
| Vent Function | Guiding | Model |
| Pressure Relief | Top Guided \& | 8910 |
| Pressure/Vacuum Relief | (Spring Loaded) | 8920 |
| Pressure Relief | Hinged (Weight Loaded) | 8930 |
| Hressure/Vacuum Relief | Hinged (Weight/Spring Loaded) | 8940 |

## STANDARD/GENERAL SPECIFICATIONS

Sizes:

$$
16 ", 18 ", 20 \text { " and } 24 \text { " Flanged to mate with }
$$ standard 150\# ASME. 20" and 24" to API 650 bolting specifications. Other drilling patterns available on special request.

| MATERIALS OF CONSTRUCTION |  |  |
| :---: | :---: | :---: |
| Flange Base | Pressure Pallet / Seat | Hood |
| Aluminum | Aluminum | Aluminum |
| 304 SST | 316 SST | SST |
| 316 SST | 316 SST | SST |

| Diaphragm | FEP-TFE: |
| :---: | :---: |
| Temperature | $-400^{\circ}$ to $400^{\circ} \mathrm{F}\left(-240^{\circ}\right.$ to $\left.204^{\circ} \mathrm{C}\right)$ |
| Limits: | Fluorocarbon Elastomer - (FKM): |
|  | $0^{\circ}$ to $400^{\circ} \mathrm{F}\left(0^{\circ}\right.$ to $\left.204^{\circ} \mathrm{C}\right)$ |
|  | Buna-N (Nitrile-NBR): |
|  | $-30^{\circ}$ to $200^{\circ} \mathrm{F}\left(-34^{\circ}\right.$ to $\left.93^{\circ} \mathrm{C}\right)$ |
|  | EPDM (Ethylenepropylene): |
|  | $-40^{\circ}$ to $225^{\circ} \mathrm{F}\left(-40^{\circ}\right.$ to $\left.107^{\circ} \mathrm{C}\right)$ |

Top Guided: SST Springs
Pressure Spring Ranges for Models 8910 \& 8920: from 0.5 to 15 psig. Vacuum Spring Ranges for Models 8920 \& 8940: from 0.2 to $4 \mathrm{oz} / \mathrm{in}^{2}$. (All sizes and body materials.)

Weight For Set Points below $8 \mathrm{oz} / \mathrm{in}^{2}$.
Loaded: Three Designs are available:

1. Stack weighted design uses CS/SST weights.
2. Counter weight design uses CS/SST weights. Use when SetPoint pressure is below Nominal Pressure. See Table 1. 3. Weighted arm design uses CS/SST weights. Model 8930 only.

Painting: Standard: All non-corrosion resistant parts to be painted with corrosion resistant epoxy paint per Cashco Spec \#S-1777.
